# **2025 International Conference on Healthcare Technology and Higher Education in Nursing**

Theme: Shaping future nurses for the new era of precision healthcare

Precision healthcare involves delivering personalized healthcare tailored to an individual's unique genes, lifestyle, or preferences. This is achieved through disease risk detection, evidence-based intervention, and multidisciplinary team collaboration. An upcoming event will bring together innovators, experts, scholars, and stakeholders from the United States, Japan, and Taiwan to present the latest advances in healthcare technology. The event will also explore the rapid evolution and integration of AI technology in educational settings, focusing on how these powerful tools can enhance teaching and learning experiences in nursing. The goal is to prepare future nurses for the new era of precision healthcare and to achieve quality nursing care in preventive care, health promotion, and optimization.

精準健康照護意指依據個人獨特的基因、生活型態或喜好，透過偵測疾病風險、以實證為基礎之介入、跨專業團隊合作，提供個別化的健康照護，本研討會將會集來自美國、日本、台灣三國之創新者、專家、學者和利益相關者，深入探索健康照護科技的最新進展，探討人工智慧科技在護理高等教育的快速發展和整合，並關注如何運用科技工具培育人才，提升護理學生的學習成效，因應精準健康照護新時代，達到預防保健、健康促進與優化的護理照護品質。
